

Thor Able Launch Vehicle v. II for Tiros 1

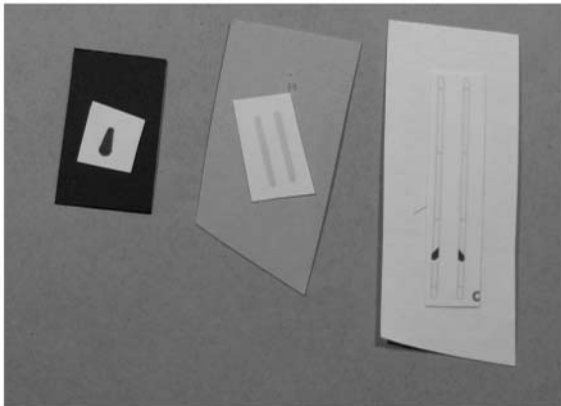

Beside the modelsheet and this instruction
- you also need the instruction for Thor-Able I (Pioneer 1).

Simply follow the instruction for Thor-Able I (Pioneer 1).
- until you reach the chapter "Assembling the upper stages" on page 4.

Your model should now look like this.

Assembling the upper stages

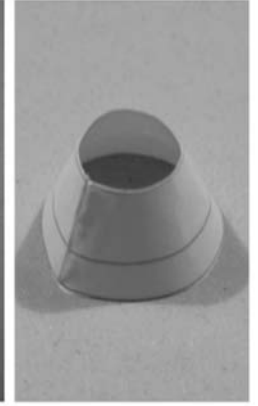

Glue CA-1 and CA-2 to white cardboard.
Glue x2 to grey cardboard and x-1 to black cardboard.

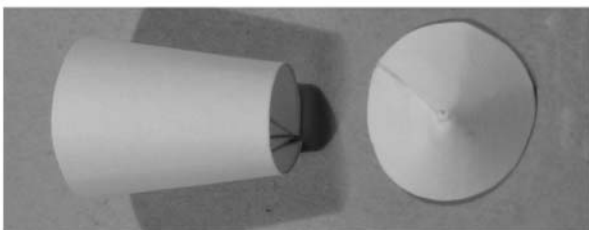

Roll A1 into a tube.

Glue the connectors inside each end of A1.

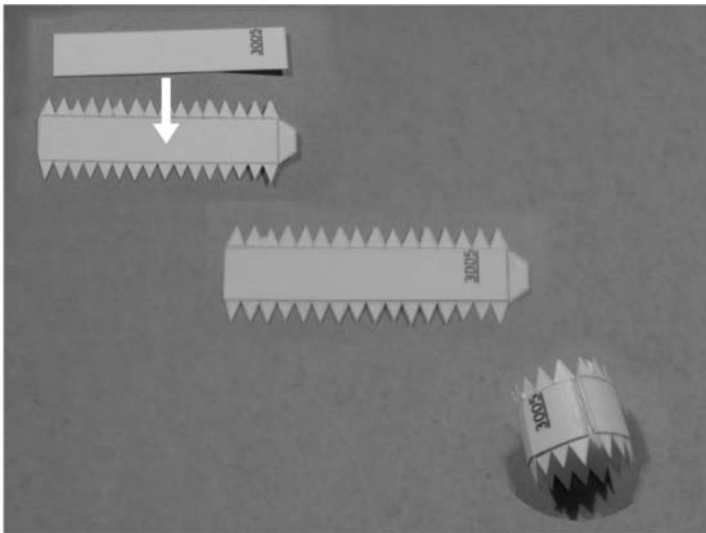

Glue A2 into a cone.

Then glue A3 and A6 into cones.

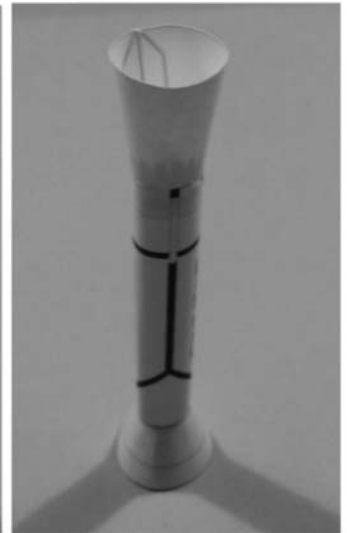

Thor Able Launch Vehicle v. II for Tiros 1

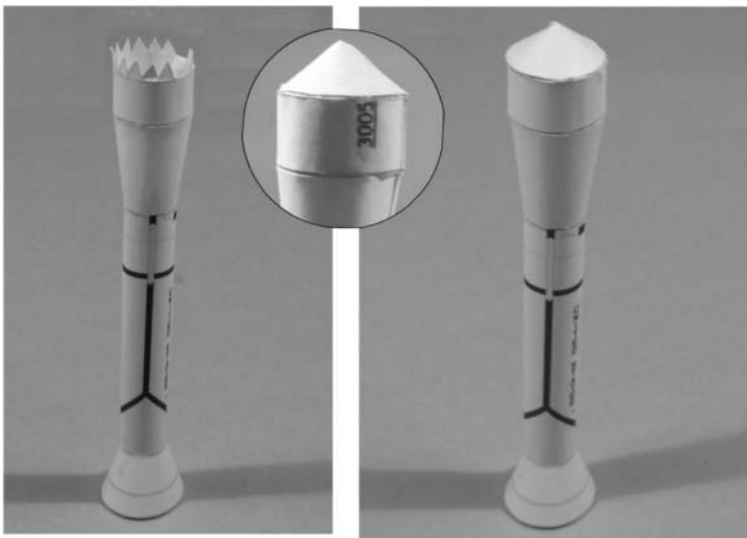

Glue A4 upon A5. Allow to dry. Then roll it into a cylinder.

Glue A1 to A2.

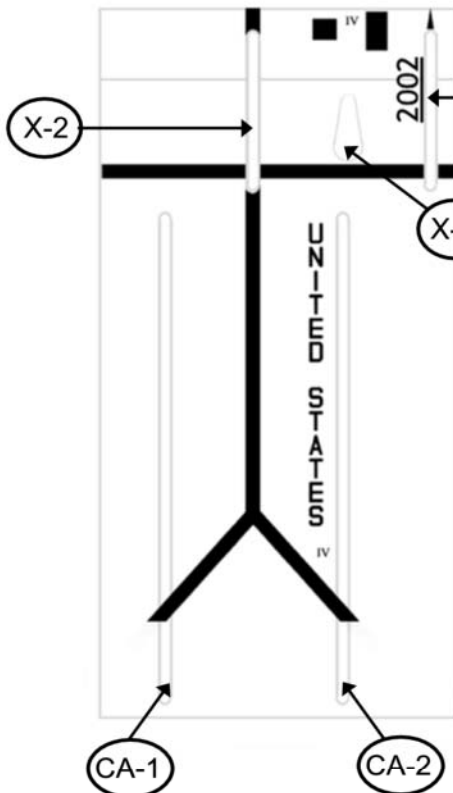

Glue A3 at the top of A1.

Glue A5 on A3.

Finally glue A6 on A5.

Glue CA-1 and 2, X-1, X-2 in place. Make a stand and your model is ready for display.
