

Display Stand for 1/96th scale THOR 'IRBM' and variants

Most colorful results are obtained with a photo setting, and photo paper

display stand post

1CM
1inch

1: score all lines and flaps on the base. Cut out the white circles, fold and glue the base as shown in the diagram above.

2: Cut out, roll up and glue the display stand post, to white circle on top of the stand. Let dry.

Place the THOR Missile over the post and downward with a gentle twisting motion until the missile feels solid on the stand.

If the THOR will not fit firmly onto the cone, trim just a little off the top of the cone, and refit the missile.

Glue on the optional display placard and enjoy your model!
